Fixed Bugs

BUG-52444 Remove the `-lightmode` Option from iloader.

- **module** : ux-iloader
- **Category** : Functionality
- **Reproducibility** : Always
- **Description** : The `-lightmode` option has been removed from `iloader`. This option is no longer available.

BUG-52456 Remove the `-direct` Option from iloader.

- **module** : ux-iloader
- **Category** : Functionality
- **Reproducibility** : Always
- **Description** : The `-direct` option has been removed from `iloader`. This option is no longer available.

BUG-52499 Fixed an issue where using `audit` could cause the server to crash due to a memory error.

- **module** : mm-statement
- **Category** : Memory Error
- **Reproducibility** : Rare
- **Description** : In environments using `audit`, when executing a statement using the Direct Execute method, a memory error could occur during the statement cleanup process, potentially causing the server abnormal termination. This issue has been resolved.

BUG-52502 Fixed an issue with Level 1 incremental backups failing.

- **module** : sm
- **Category** : Fatal
- **Reproducibility** : Always
- **Description** : When a Level 1 incremental backup was performed while multiple sessions were concurrently modifying data, a concurrency issue during change tracking could cause an `ERR-42000` error and cause the backup to fail. This issue has been fixed so that Level 1 incremental backups can be performed successfully even when data modifications occur concurrently across multiple sessions.

Changes

Version Info

altibase version	database binary version	meta version	cm protocol version	replication protocol version
7.3.0.2.4	7.3.0	9.4.1	7.1.8	7.4.9

You can check the module version change history in [Version Histories](#).

Compatibility

Database binary version

The database binary version has not changed.

The database binary version indicates the compatibility of database image files and log files. If this version needs to be patched to a different version, the database must be reorganized.

Meta Version

The meta version has not changed.

If you want to roll back the patch after patching to a version with a changed meta version, see [Meta Downgrade](#).

CM protocol Version

The cm protocol version has not changed.

Replication protocol Version

The replication protocol version has not changed.

Properties

No properties added/changed/deleted.

Performance Views

No performance views added/changed/deleted.
