New Features

BUG-52233 Add GZIP_COMP_LEVEL property for gzip compression level configuration

- **module** : ux-abm
- **Category** : Functionality
- **Reproducibility** : Always
- **Description** : Added the `GZIP_COMP_LEVEL` property to `abm.properties` file for configuring the gzip compression level in abm (default: 6).

Fixed Bugs

BUG-51905 Fixed replication issue for disk tables with LOB columns in adapter

- **module** : rp-jdbcAdapter
- **Category** : Functional Error
- **Reproducibility** : Always
- **Description** : Fixed an issue where replication failed for disk tables containing LOB columns in the adapter.

BUG-52106 Fixed missing server error messages during incremental backup in abm

- **module** : ux-abm
- **Category** : Functionality
- **Reproducibility** : Always
- **Description** : Fixed an issue where server error messages were not displayed during incremental backup execution.

BUG-52122 Fixed incorrect error message when Change Tracking is disabled in abm

- **module** : ux-abm
- **Category** : Functional Error
- **Reproducibility** : Always
- **Description** : Fixed an issue where incorrect error messages were displayed when Change Tracking was disabled.

BUG-52168 Fixed performance issue for disk table DML after expanding BUFFER AREA SIZE

- **module** : sm
- **Category** : Functional Error
- **Reproducibility** : Always
- **Description** : Fixed an issue where DML performance on disk tables did not improve after expanding the DISK BUFFER AREA SIZE during service.

BUG-52220 Fixed server crash when executing DROP COLUMN on replicated disk tables with LOB and Supplemental Log

- **module** : sm
- **Category** : Fatal
- **Reproducibility** : Always
- **Description** : Fixed an issue where the server could crash when executing a DROP COLUMN statement on a disk table containing LOB columns and Supplemental Log, when the table is included in replication.

BUG-52226 Fixed standby server crash during DELETE log processing in SQL_APPLY mode

- **module** : rp-receiver
- **Category** : Fatal
- **Reproducibility** : Always

- **Description** : Fixed an issue where the standby server could crash during DELETE log processing when operating in SQL_APPLY mode in a replication environment with Supplemental Log enabled on the table.

BUG-52236 Fixed ASSERT failure when handling bind-less requests from older client

- **module** : qp
- **Category** : Assert
- **Reproducibility** : Always
- **Description** : Resolved a server abnormal termination (ASSERT) that occurred when a v7.3 server processed a request without bind values from a v6.1.1 client. The server now handles these protocols correctly.

Changes

Version Info

altibase version	database binary version	meta version	cm protocol version	replication protocol version
7.3.0.2.0	7.3.0	9.4.1	7.1.8	7.4.9

You can check the module version change history in [Version Histories](#).

Compatibility

Database binary version

The database binary version has not changed.

The database binary version indicates the compatibility of database image files and log files. If this version needs to be patched to a different version, the database must be reorganized.

Meta Version

The meta version has not changed.

If you want to roll back the patch after patching to a version with a changed meta version, see [Meta Downgrade](#).

CM protocol Version

The cm protocol version has not changed.

Replication protocol Version

The replication protocol version has not changed.

Properties

No properties added/changed/deleted.

Performance Views

No performance views added/changed/deleted.
